CRYPTO's RALLY

The Crypto currencies had a tremendous run in the last quarter. Digital inflows to the latter has been impressive but the overall capital outflows of the biggest exchanges have exceed those of the inflows. The XBT (Bitcoin) has reached our short term target levels and we currently recommend to take profit of the proceeds (+103% !)

Bitcoin

Strategy: take profits at current levels (USD 7830), i.e. +103%.

(For risk oriented investors, keep the initial investment into the Bitcoin and take out the proceeds. This will result in a 0% financing of the maintained exposure in case the market rallies further)

Risks: Important. Exposure only for risk oriented investors
